The gameplay character here is mostly called Tommy Vercetti, a gangster who was recently released from prison. He was sentenced to murder at the age of 15. His boss, Sonny Forelli, tried to set up drug operations in the south, sent Tommy to the auxiliary town, and so our run began. Our character has been in the drug market and has been ambushed and now he is looking for those responsible for building his criminal empire and seeking power from other criminal organizations in the city. This game is played from a third-person point of view and the world is explored on foot or by car. The open design allows players to move freely through the auxiliary city and is mainly based on two candidates. The player must complete tasks to discover other tasks and opportunities. If someone didn't want to complete the mission, by then they could roam freely around the world with unlocked components. The player can also carry out combat attacks, including firearms and explosives. He could use firearms like a colt python, m60 machine gun and mini gun. Players have a target assistant that they can use during combat. The player has a wide variety of weapons to choose from, to be found in a nearby firearms dealer, dead or found in people around the city. The target assistant can be used during combat. There are body armor that can also be used to mitigate the effects of damage. On the screen of the head there is a counter, which we have to check whether the character commits a crime, then rises the desired counter and it does the appropriate criminal investigation authority. Some stars show the desired level (for example, for the highest character, the character has 6 stars to achieve, and therefore police helicopters and military herds to kill players). If the character's health level is exhausted and he dies, he will be reborn with all the weapons in the nearest hospital, and some of his money will be deducted. In missions, the character meets many gang members, while members of his friends' gang defend him, while an enemy gang member tries to shoot him. In addition, during free roaming the player can complete other mini-games, such as wake mini-games, work as a taxi driver or firefighter. The player can buy different buildings where he or she can store more vehicles, and other weapons can also change and be stored in emergencies. It can also buy other businesses such as pornographic studios, entertainment clubs and taxi companies. But buying commercial real estate is not as easy as it seems, every commercial property has different tasks, such as killing competition, stealing equipment. When all tasks are completed, the properties begin to receive a continuous income.
